Product Description

IEC (Immediate Emergency Care) Response Bag

This emergency response bag is designed to quickly identify and treat life-threatening emergencies in fire, police, and other high-risk situations. It includes only equipment proven efficient and simple to use in challenging conditions.

The IEC Response Bag has been designed to support prolonged rescues, multiple casualty incidents and provide a primary response to an incident occurring in high-hazard environments.

Crafted from ultra-high-quality materials, the bag is extremely robust, can accommodate a diverse range of medical equipment, and has a fixed lifting point.

DEVELOPMENT OF IEC EQUIPMENT

Over 6 years of development has gone into the design, structure and layout of the IEC equipment system, which is based on industry credible injury scenarios and models of working. Each item of equipment is included due to its clinical effectiveness and ease of use in a challenging environment.
