MEDICAL & RESCUE

Service Description

EURIECA® Awareness Course (EAC)

The EURIECA® programme provides comprehensive training, equipment, and telemedicine services within a structured clinical governance framework.

EURIECA® is a key component of Emergency Response Planning for the majority of Offshore Wind Organisations across the United Kingdom, and is increasingly being adopted in Europe and the USA.

PURPOSE OF THIS COURSE

It is widely acknowledged that shore-based teams responsible for site coordination and control are the pivotal link in communication, particularly during active emergency response scenarios, which impose high pressure and test the knowledge of individuals.

In light of this, the EURIECA® Awareness Course (EAC)'s primary objective is to enhance participants' understanding of the EURIECA® programme, enabling effective operational planning and preparation. This will lead to the formation of a high-performing team that will significantly enhance outcomes when responding to any potential emergency situations.

In addition to enhancing their understanding of the operational challenges associated with working in remote and austere environments, medical terminology, and inter-agency collaboration, participants will also receive training in emergency first aid skills, including management of bleeding, and basic life support using Automated External Defibrillators (AEDs).

THE EURIECA® AWARENESS COURSE IS CROSS-CERTIFICATED AS AN HSE EMERGENCY FIRST AID AT WORK (FAW) QUALIFICATION.

EURIECA®

Course summary:

- Duration: 1 Day
- Maximum Participants: 6 per instructor
- Course Prerequisites: None
- Certificates valid for: 3 years
- Flexible Choice of Venues: Client Site or Gibb Training Centre

Course includes:

- Hands-on, practical training
- Delivery by certified healthcare professionals, who work at the forefront of pre-hospital care
