GIBB GROUP
MEDICAL & RESCUE

Service Description

GWO Enhanced First Aid (EFA) Course

This course equips individuals in the wind turbine industry with the knowledge, skills, and abilities to provide enhanced first aid and support to their colleagues. The course is structured to deliver theoretical and practical training in accordance with the Global Wind Organisation (GWO) Enhanced First Aid (EFA) Training standards.

Upon successful completion, participants will be able to administer safe, effective, and immediate lifesaving measures, including enhanced first aid, enabling them to save lives and provide assistance in remote areas. This knowledge will be instrumental in utilising advanced emergency equipment and medical teleconsultation when necessary.

OBJECTIVE OF THIS COURSE

The objective of this course is to equip participants with the skills and knowledge necessary to provide support and care to individuals working in the industry. It will equip them to offer ongoing care to an ill or injured casualty during the interim period between the arrival of professional emergency rescue teams and their arrival.

The overall learning objectives for the EFA course are:

- Participants can take responsibility for administering safe, effective, and immediate lifesaving and enhanced first aid measures in an emergency in a Wind Turbine Generator (WTG) environment (ability, intermediate level)
- Participants can act independently in giving assistance in remote areas using advanced emergency equipment and medical teleconsultation (ability, intermediate level).

COURSE DELIVERY

- EFA training is delivered over 3 days, and refresher training is delivered over 2 days
- Upon completion of the course, students are awarded GWO Enhanced First Aid certificate
- This remains valid for two years from assessment date.

Course summary:

- Duration: 3 Days
- Maximum Participants: 6 per instructor
- Course Prerequisites: None
- Certificate valid for: 2 years
- Flexible Choice of Venues: Client Site or Gibb Training Centre

Course includes:

- Hands-on, practical training
- Delivery by certified healthcare professionals, who work at the forefront of pre-hospital care
- Life-like experiences using realistic manikins

SUMMARY OF SYLLABUS

The content of the BST Enhanced First Aid (EFA) module is:

- Introduction
- Risks, Hazards & Legislation
- Anatomy & Physiology
- Management of an incident / Emergency response / Medical teleconsultation
- Lifesaving / EFA using Primary & Secondary survey
- Pain management & Further medication
- EFA exercises / Scenario based training
- Review & feedback session.

ADMISSION REQUIREMENTS

Delegates must be medically and physically fit to carry out the practical aspects of the course and be free from medical contraindications that could impair their safety (a list of conditions potentially affecting practical safety training is available upon request).

Course participants are required to self-certify their medical and physical fitness prior to the commencement of the course. They must also be fluent in English and at least 18 years of age.

All delegates attending a GWO Training course must provide a WINDA (www.winda.globalwindsafety.org) ID before undertaking training. A WINDA ID can be obtained by creating a profile in WINDA.

CERTIFICATION

Upon completion of the course, students are awarded GWO Enhanced First Aid (EFA) certificate, which remains valid for two years from assessment date.
