Service Description

MACER (Mass Casualty Event Responder) Course

The Mass Casualty Event Responder – MACER – Programme is designed to prepare Zero Responders to bridge "the care gap" and become a vital component part of Emergency Response Planning & Resilience for areas of high occupancy in the UK.

The MACER course is just one component of a full programme that incorporates training, equipment, and clinical governance.

PURPOSE OF THIS COURSE

It is widely acknowledged that staff who work and operate in and around areas of high occupancy, such as sports stadiums, public transport hubs, and retail properties, are likely to be the first responders to provide immediate life-saving assistance in the event of a major incident on-site.

Basic first aid training is no longer deemed sufficient for staff members who work in these areas due to the inherent risks and hazards they will encounter, as well as the potential injuries commonly associated with major incidents.

The MACER course has been designed to address this gap, ensuring that staff operating in these areas are adequately prepared to deliver critical lifesaving interventions. MACER focuses upon providing participants with the knowledge, understanding and skills in :-

- The application of the Ten Second Triage (TST) Tool
- Immediate lifesaving interventions including major haemorrhage control and airway management
- Priming effective planning
- Preparation.

This will lead to high performing team members, who improve patient outcomes when responding to any emergency situation that may occur.

Participants will gain an improved understanding of the operational constraints that working in a stressful situation brings, the medical related terminology employed, and the requirements for inter-agency working. They will learn how to apply emergency first aid skills, including management of bleeding, and basic life support using an Automated External Defibrillator (AED).

MACER is a cross-certified HSE Emergency First Aid at Work (FAW) Qualification.

Course summary:

- Duration: 1 Day
- Maximum Participants: 10 per instructor
- Course Prerequisites: None
- Certificates valid for: 3 years
- Flexible Choice of Venues: Client Site or Gibb Training Centre

Course includes:

- Hands-on, practical training
- Delivery by certified healthcare professionals, who work at the forefront of pre-hospital care

COURSE CURRICULUM OVERVIEW

- The core elements of Emergency First Aid at Work (EFAW)
- Introduction to the MACER basic algorithm, equipment & terminology
- Catastrophic bleeding management
- Basic airway management techniques
- Triage – Utilising the TST tool
- Basic life support (CPR, choking, recovery position)
- Scenario based training
- PAcT Kit application.

INTENDED AUDIENCE

- Retail and Event Sector personnel
- SIA Security Team Members
- Stadium Support Service Staff
- Public Transportation Operators.
