GIBB GROUP
MEDICAL & RESCUE

Service Description

Offshore Medic (OSM) Course

Gibb Medical & Rescue's Offshore Medic Course represents the flagship training course in the offshore medic landscape.

The course is delivered by subject matter experts including operational offshore medics, consultants in pre-hospital care, remote dentists, and advanced first aid practitioners.

CANDIDATES WILL GAIN CERTIFICATES IN ALL OF THE FOLLOWING:

ALS (ADVANCED LIFE SUPPORT)

Developed by the UK Resuscitation Council for the benefit of healthcare professionals who may have to act as the first responder in an emergency, this course teaches the skills to manage patients in cardiac arrest, resuscitation, including delivery of CPR, recognition and management of the deteriorating patient, and to work in a team during emergency situations.

ALS enhances your practical skills with simulations and workshops. It specifically targets key areas of resuscitation to build the confidence required to take the lead in an emergency situation.

The course is also recognised by the European Resuscitation Council and the Australian Resuscitation Council, giving the freedom to use lifesaving skills in other countries.

PHTLS (PRE-HOSPITAL TRAUMA LIFE SUPPORT)

PHTLS was developed by the US National Association of Emergency Medical Technicians (NAEMT), and is recognised around the world as the leading continuing education program for Pre-Hospital emergency trauma care.

PHTLS courses improve the quality of trauma care and decrease mortality, with the programme being based on a philosophy stressing the treatment of the multi-system trauma patient as a unique entity with specific needs. PHTLS promotes critical thinking as the foundation for providing quality care. It is built on the belief that, given a good fund of knowledge and key principles, PHTLS practitioners are capable of making reasoned decisions regarding patient care.

The two-day PHTLS course is regarded as the global gold standard in Pre-hospital trauma education, is taught over 60 countries.

Course summary:

- Duration: 10 Days
- Maximum Participants: 6 per instructor
- Course Prerequisites: A professional healthcare qualification
- Certificates include all of:
  - ALS (Advanced Life Support)
  - PHTLS (Pre-Hospital Trauma Life Support)
  - EURIECA® Advanced First Aid

EURIECA® ADVANCED FIRST AID

The EURIECA® advanced first aid course is the most advanced first aid course available to non-healthcare professionals. The course has been developed based on industry incident data, multiple renewable energy medical needs assessments, the GWO's Enhanced First Aid (EFA) standard and the latest evidence based clinical practice.

Following extensive work with a number of renewable energy organisations and the subsequent development of a list of credible injury scenarios, the Gibb Group has identified a number of advanced skills that are required in addition to the GWO EFA syllabus.

The EURIECA® course bridges the gap between basic first aid and professional medical help by empowering teams and organisations to deliver the right care, at the right time, with the right equipment every time.

As a testament to Gibb Medical & Rescue's commitment to quality, the EURIECA® course has been approved and endorsed by the Royal College of Surgeons of Edinburgh's Faculty of Pre-Hospital Care (FPHC).

GWO EHHANCED FIRST AID (EFA)

The Global Wind Organisation (GWO)'s EFA course enables individuals in the wind turbine industry to support and care for others working in the industry by possessing the knowledge, skills, and ability of enhanced first aid. The course is delivered via theoretical and practical training.

Upon completion, candidates will be able to administer safe, effective, and immediate lifesaving and enhanced first aid measures to save lives and give assistance in remote areas using advanced emergency equipment and medical teleconsultation).

GWO BASIC FIRST AID

Candidates are trained to administer safe and effective first aid, in accordance with Global Wind Organisation (GWO) Basic Safety Training (BST) first aid training guidelines, through theoretical and practical training.

Suitable for those working in both onshore and offshore Wind Turbine Generator (WTG) environments, the course provides personnel with the skills and knowledge to enable them to work in a safe manner, and to meet the industry's basic emergency response training requirements.

EURIECA® MENTAL HEALTH FIRST AID

This course is designed for individuals seeking to become Mental Health First Aiders in their workplace. The course equips candidates with a comprehensive understanding of mental health, empowering them to provide effective support, reassurance, and guidance to their colleagues in need of professional assistance.

Learners gain comprehensive knowledge regarding prevalent mental health issues that impact the workplace, including stress, depression, anxiety, and post-traumatic stress disorder.

You will learn to recognise the symptoms of mental health issues, provide initial assistance, and guide a person towards appropriate professional help.

The course is structured to align with the Qualsafe Level 2 and Level 3 Awards in Mental Health First Aid in the Workplace.
